

Product description

Timeline is a game of adventure in time. It doesn't matter whether you are passionate about history, loving to challenge your friends or just want to learn about historical events either for the purpose of school or simply learning for life, the game Timeline is a game that you will need and love.

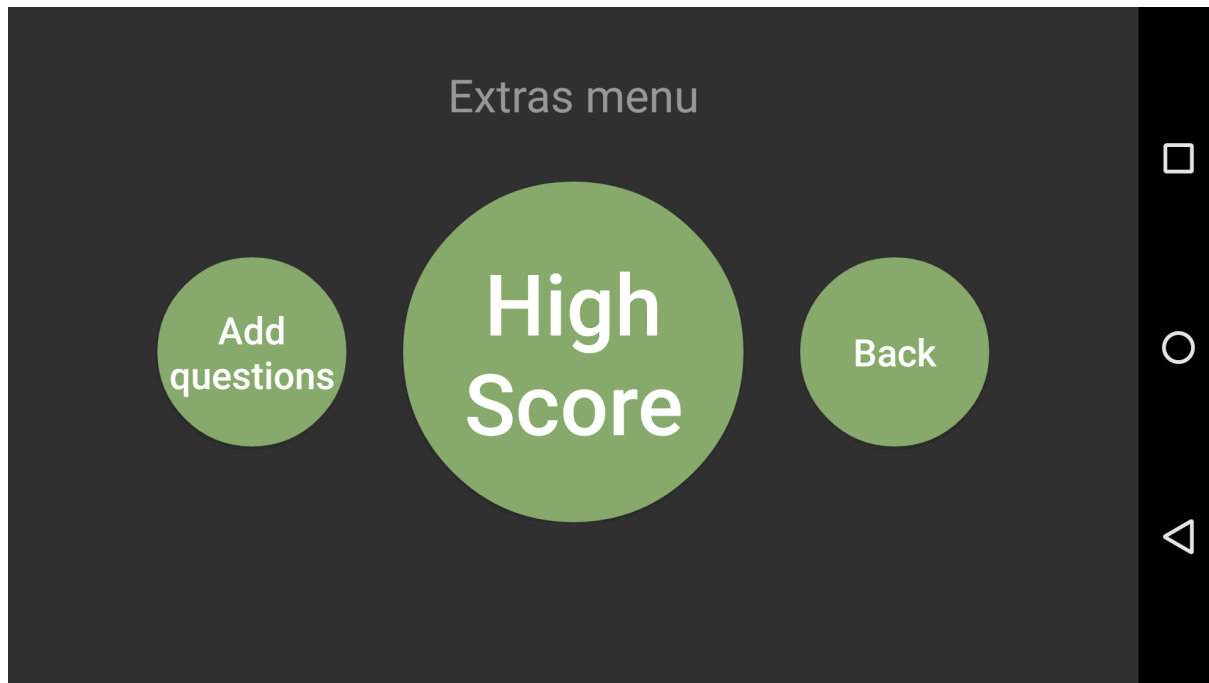

In Timeline you are able to challenge yourself by playing time after time and saving your former results in a high score list, so that you can see how well you are improving your skills in history. You are also able to challenge and compete against your friends by playing over one single device. It is possible to play as much as five people together. Timeline also lets you your own questions and categories that you likes most. This might be helpful for you if you are a student or if you simply are very interested within a certain subject. Further you can choose a predefined category in which that you want to challenge your self or your friends of your favor.

When you start the app you will arrive to a start menu. From the start menu you will have access to three new views via three buttons. The Extras button will take you to the Extras menu, the Quickplay button will let you play in a single play mode with standard settings and the Custom Play button will let you choose the number of players and category.

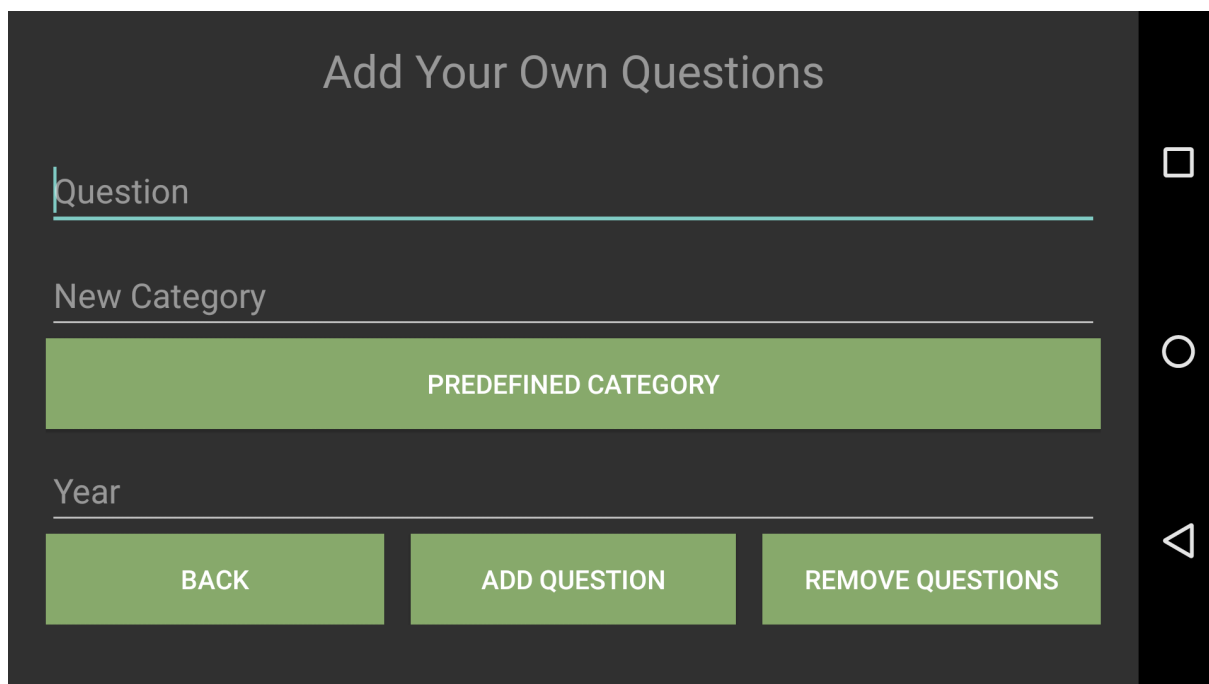

Picture 1

The Extras menu consists, just as the start menu, of three buttons. The Add questions button will take you to the Add questions menu, the High Score button will take you to the High Score menu and the Back button will take you to the start menu.

Picture 2

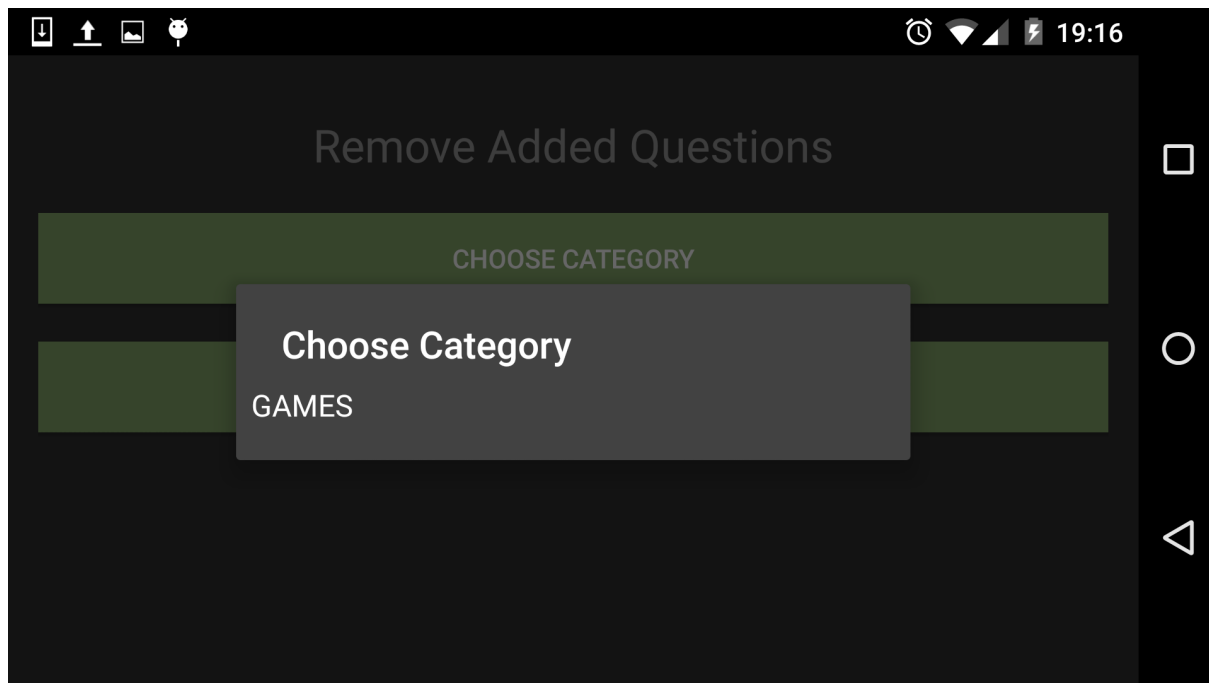

Picture 3 shows the Add questions menu. This menu let you add the questions and categories that you want. In the first text field you are supposed to fill in a statement that describes a historical event. In the second text field you need to select a category, either a new category or a predefined category that you can choose by clicking the button Predefined Category.

Picture 3

Thereafter it's required that you fill in the year when the event took place in the third text field. When all the information that you need for the question you press the add question button. If of the text fields is not filled in when you press the add question button, you will be asked to fill in the rest of the information. By clicking the button remove questions, you will come to another menu where you will be able to remove the questions that you earlier have created. The Back button will take you back to the Extras view.

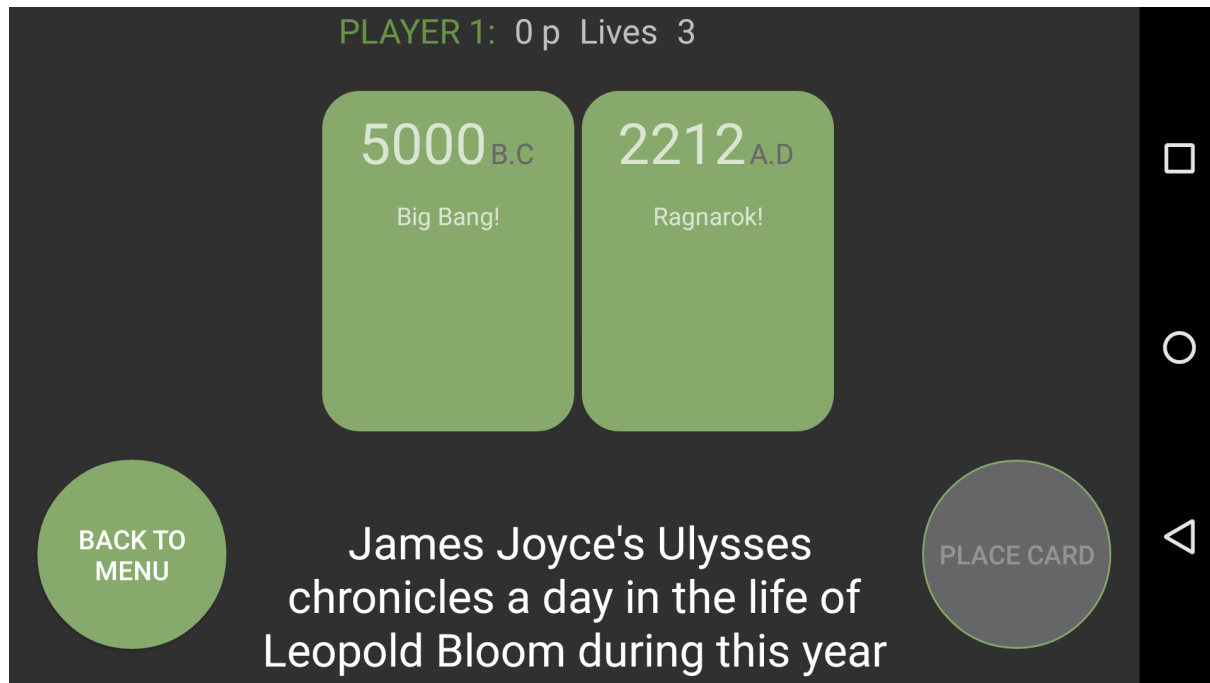

In the view Remove Added questions you will be able to choose a category from which you want to remove questions. After you have chosen a category, the questions that you have created in that category will appear, and you will be able to remove them.

Picture 4

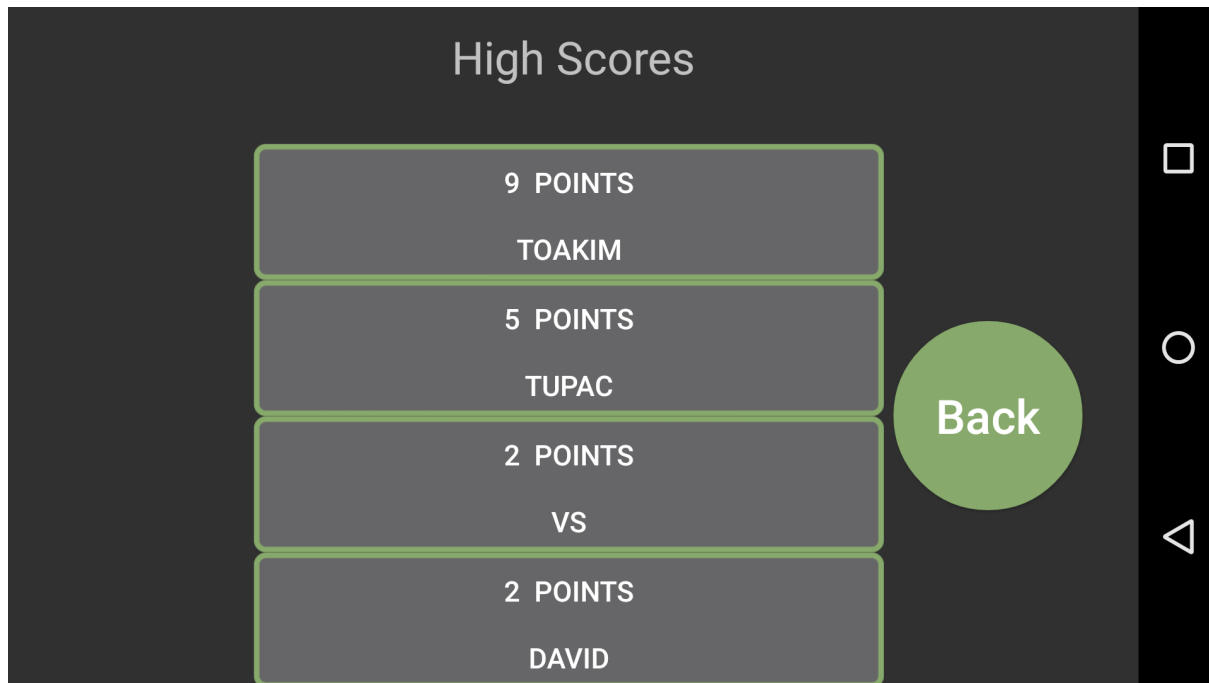

If you click the Quickplay button shown in the start menu shown in picture 1, you will get directly to the game view shown below in picture 5. The Quickplay gives you the standard settings e.i. single player mode with all categories chosen. To play the game you are supposed to find between which historical events that are already placed on the board that the historical event took place that is written below the green history cards. If you press two cards that are located beside each other, the Place Card button to the right in the display will shift from disabled to enabled. When you have clicked the Place Card button then another card with your historical event will be placed at the right chronological location on the game board. If you managed to identify the two cards between which your historical event happened, then you will get another point. If you did not manage to answer it correctly, then you will lose one life and a red text will appear below the cards that tells you that you were wrong and what the correct answer would be. After having lost three lives you will get the message that the game is over. If

you managed to do very well, then it will appear a dialog window asking you to type in a text string, and your result will be saved as a new high score. By clicking the Back To Menu button you will return to the start menu shown in picture 1.

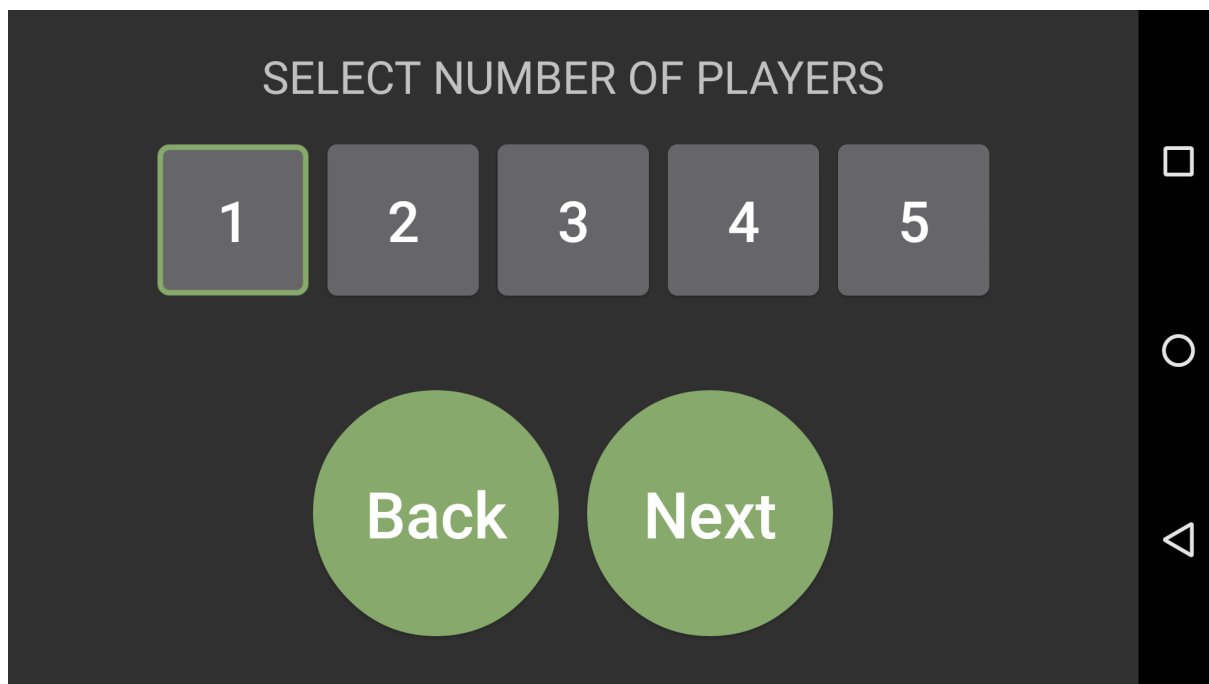

Picture 5

By clicking the High Score button shown in picture 2 you will access the High Score menu shown below in picture 6. In this menu you can watch the previous results and the corresponding name.

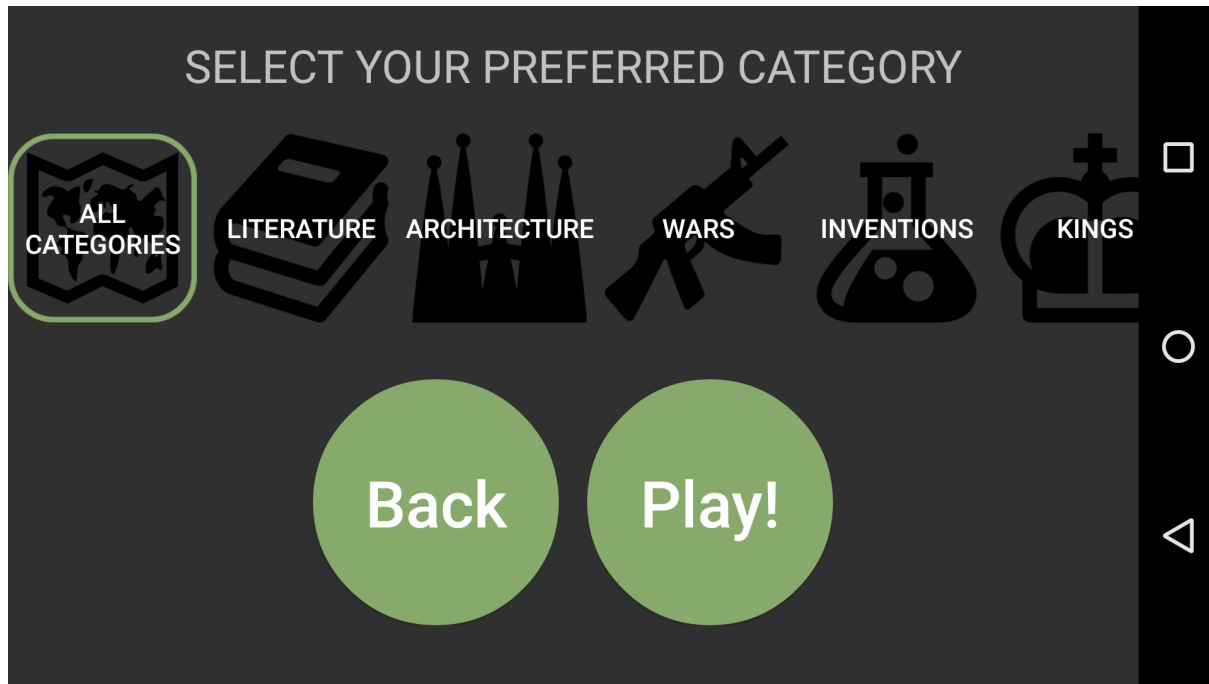

Picture 6

Picture 7 shows the first view of that you arrive to after having pressed the Custom Play button. In this view you decide whether you want to play a Custom Play alone or together with more players. You can play up to five players in one single game. After you have pressed the button corresponding the number of players that want to play, then press the Next button to arrive to the Category menu.

Picture 7

In the Category menu shown in picture 8 you can choose a maximum of one category that you want to play. The default setting is that you play with all categories. If you want to play a custom play with a specific category, then you simply press the icon of the preferred category. When the category is marked with a green frame then you press the Play button and you will get to the game view.

Picture 8

If you previously have added categories that you want to play, scroll the bar to the right and you will find an icon on which it is written Custom Categories. Then it will appear a list of all the categories that you have created. Please choose one of them and then click the Play button.

When you are playing in multiplayer mode i.e. more than one player, the game view will get a slightly different look. All the players with their corresponding number of points are shown at the top of the display. In single player mode, the number of lives that remains is shown beside the number of points. That is not the case in this situation because the rules of the game are different in the multiplayer mode. Instead of losing a life as in the single player mode, you lose one point for a wrong answer. In the multiplayer mode you need to relocate your answer until you have answered correctly and for every time you are wrong you will lose one point. Though it is not possible to get a negative number of points. When the game has ended it will be written who is the winner of the game as shown in picture 9.
