Quick-start Guide for Timeline

Start-menu

At the **Start-menu** you will have three options: **Quickplay**, **Custom play** and **Extras**.

Press **'Quickplay'** to start playing instantly. This is the default Singleplayer mode with 'all categories' (own questions excluded) and 'High Score mode' activated.

Quickplay

1. You will initially see a Timeline consisting of two game cards (*Big Bang* & *Ragnarök*). These two cards defines the ends of the timeline in a chronological order.

2. A text describing a historical event appears. Your task is to place the historical event correctly in the Timeline, by **selecting two adjacent cards** and placing the historical event **between** the selected cards.

3. Once you have selected two cards, press the **'Place Card'** button.

4. If the placement is correct, the event will be placed in the Timeline and Player will **receive 1p**. If the placement is wrong Player will instead **loose a life**. After placement a new historical event will appear. The procedure restarts from step 2 until Player has no lives left.

5. When the **Player** has no lives left, the game will end. A High Score popup windows will appear if the Player's score is one of the top four recorded game scores.

6. Press **'NEW GAME'** to start a new game session, or press **'BACK TO MENU'** for other game options.

Custom Play (and Multiplayer)

1. To create a customized game session; on Start-menu, press **'Custom Play'**.

2. Here you can choose the number of players you want for the game session. Press **'Next'**.

3. You can now choose your preferred category for the historical events. There is also a category for choosing your own defined historical events (see *Extras: Add Questions*).

4. Press **'Play!'** to start a new customized game session.

5. The principle for a Multiplayer game is almost the same as for Singleplayer game, except that the Player has to place a historical event until the placement is correct. For every misplacement, **1p is lost**.

6. After a correct placement it will be the next Player's turn (if more than one player).

7. Game session will end after three ended turns played per player. The Player with the highest score wins the game.

Extras

The extras consists of possibilities to add your own question and to see the High Scores.

Highscore:

1. Press **'High Score'** button to go to the High Score screen.

2. Here you see the players with the top four scores of the Quickplay mode.

Add Questions:

1. Press **'Add Questions'** on the Extras menu.

2. In the *'Question'* textfield type your own question.

3. You can put the question with your own defined category by typing into *'New Category'* textfield, or choose a predefined category by pressing the **'PREDEFINED CATEGORY'** button.

4. Enter a year for the question in the **'Year'** textfield.

5. Press the **'ADD QUESTION'** button to add the new question.

Remove Questions

1. Press the **'REMOVE QUESTIONS'** button on the Add Questions screen.

2. Press the **'CHOOSE CATEGORY'** button and select a category from the popup-list to see all the added questions in the selected category.

3. Press the question that you want to remove. A confirmation popup windows will appear before removal.
